EXPERIENCE

TestMu AI — Senior Product Designer Oct 2025 – Present

- Designed & shipped **AI test case generation**, **AI deduplication** & AI failure root-cause analysis, letting users review, refine & act on AI output.
[Read case study](#)
- Shipped UX-debt fixes via **2 production PRs** & built a Claude Code-ready repo for PMs to prototype on production components & layouts.
- Initiated a **design system revamp**: AI components, missing variants & props, tokens, dark & light high-contrast themes, and Storybook updates.

Lenskart — Senior Product Designer Sep 2022 – Sep 2025

- Owning end-to-end experience for **Lenskart's Omni-channel pod**, aligning online & in-store customer journeys across **mobile app**, **iPad POS** & **Store TV**.
- Led design of **in-store eye test journey** for **1600+ stores** that **reduced wait time by 38% & increased sales conversions by 2.7%** in Q2 2023.
[Read case study](#)
- Conducted **contextual inquiry** through store visits, **UX audits & benchmarking** (retail kiosks, airports) to identify friction points.
- **Redesigned lens discovery** on customer mobile app & iPad POS to **reduce drop-offs** caused by unclear compatibility of eyeframes & powered lenses.

dox2U — Product Designer Jun 2020 – Aug 2022

- **Designed core workflows** for document upload, smart tagging & sharing for **web app**.
- Partnered with product owner to **maintain product roadmap**, breaking high-level requirements into **epics, features & user stories**.
- Drove design initiatives to refine product-market fit & **iterated quickly on feedback from B2B clients**.

Apporio Infolabs — UI/UX Designer Mar 2019 – May 2020

- Designed **on-demand mobile apps & dashboards for B2B** & logistics clients such as taxi-booking.
- **Notable project**: logistics ops dashboard for Nigerian government, managing multiple interfaces across truck driver, manager & admin roles.

EDUCATION

B.Tech (IT) — GGSIP University, Delhi 2012 – 2016

SKILLS

AI Product Design:

Human-in-the-loop AI workflows, transparency & trust patterns, context controls, AI components.

Interface & Systems Design:

Atomic design, responsive UI, tokens, theming & design systems (web, iPad & mobile), Storybook docs.

Design Engineering:

Code prototypes on production components, UX-debt fixes shipped via PRs, Figma plugin development.

Product Thinking:

Epic/feature/user story breakdown, edge-case & scope definition, roadmap alignment, design KPIs.

Research & Discovery:

Contextual inquiry, heuristic evaluation, usability audits, competitor benchmarking, user flow analysis.

Collaboration & Delivery:

Cross-functional sprints, detailed dev-handoff, stakeholder sync, junior designer reviews.

Tools:

Figma, GitHub, Claude Code, VS Code, Storybook, Jira.
